

SEEKING PARENTS AND CAREGIVERS OF CHILDREN WITH CEREBRAL PALSY

SHARE YOUR STORY!

The [SMILe lab at Northeastern University](#) is recruiting parents and caregivers of children with cerebral palsy (CP) to share their experiences. If you have a child with CP in grades 3-9 who communicates primarily through speech and has a history of communication and/or literacy difficulty, we would love to hear from you!

This study includes a brief screening, a short survey and a 45-minute Zoom-based interview with a researcher about your experiences related to your child's communication and literacy development.

Your participation will help us to identify new ways to support families of children with CP. You will receive a gift card for your participation.

For more information, email smilespeechlab@northeastern.edu or scan the QR code so we can reach out to you.
