Does Your Child Have Cerebral Palsy?

Join our research study to help improve future treatments.

We're inviting children with Cerebral Palsy to join a study exploring how their muscles and nerves respond to gentle, non-invasive spinal cord stimulation.

Who Can Participate?

- Children ages 3–17 with Cerebral Palsy
- Able to walk with or without assistance

What Will My Child Be Asked to Do?

- Movement and strength exercises
- Mild, non-invasive stimulation on the back and legs that feels like a light tap.
- Gentle, non-invasive tests that help us see how the brain communicates with the muscles

Why Participate?

- Help improve understanding of muscle and nerve function in Cerebral Palsy
- Support development of future therapies
- You'll receive compensation as a thank-you for participating

Time & Location

- 3 visits, up to 4 hours each
- UPMC Mercy Pavilion

UPMC | CHILDREN'S HOSPITAL OF PITTSBURGH

University of Pittsburgh
